Summary

Experienced Technical Director of Maintenance with a strong background in Lean Maintenance, TPM, RCM, and Six Sigma methodology. Proven ability to lead strategic maintenance transformations that reduce downtime, improve asset reliability, and increase operational efficiency. Skilled in developing KPI dashboards, analyzing failure data (MTTR, MTBF), and driving continuous improvement through hands-on leadership. Successfully executed real-world projects documented in a public portfolio. Certified Six Sigma Yellow Belt with a focus on aligning maintenance with business impact. Open to international opportunities focused on smart, efficient, and value-driven maintenance systems.

Work History

Vital

Technical Director of Energetics, Maintenance and Investitions
Vrbas

October 2023 - Present

- Implemented Lean methodology and root cause analysis using Ishikawa diagrams, reducing maintenance time by 15% in 3 months and boosting operational reliability.
- Led a multidisciplinary team of seven specialists with targeted training, cutting critical maintenance time by 45%, achieving most interventions under 60 minutes.
- Drove a 12% production increase in 6 months, improving team performance and lowering costs, enhancing overall business efficiency.

Furni Interiors
